

EGRO BYO QUICK CLEANING REFERENCE

Daily Cleaning of Under Counter Fridge

On the upper right corner of the main screen of the BYO, tap on the water drop icon to enter the cleaning menu. Tap on Milk Cleaning.

Remove the milk tubes from the milk containers and remove the milk containers from the fridge.

Add Egro Milk Cleaning tablet to an empty container and place into refrigerator.

*Use 1 Egro Milk System Cleaning tablet per milk tube.

Insert both milk tubes into the container. Continue with the on-screen instructions.

When cleaning is done, remove container and clean milk tubes if necessary. If the tubes are removed from the fridge during cleaning, make sure the fitting is properly reinstalled. Return milk containers to the fridge and re-insert milk tubes.

DO NOT SHUT OFF THE MACHINE DURING CLEANING

It will cause the machine to become disabled and your warranty may be voided.

Powering off the machine will NOT reset the cleaning counter. The only way to unblock a machine that has been blocked due to lack of cleaning is to perform the complete daily cleaning.

To re-order Egro Milk System Cleaning Tablets, please send your orders or requests to orders@ranciliogroupna.com.
