

Egro NEXT Powder Module

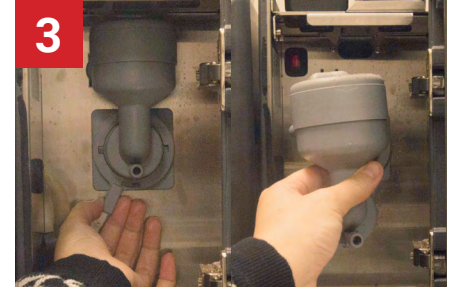

Weekly/As Needed Powder Module Cleaning

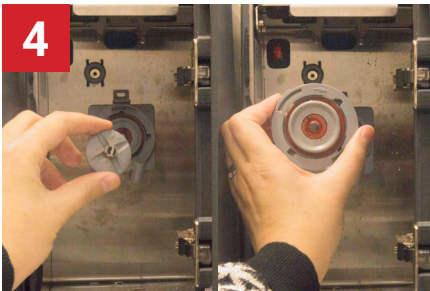

1 Open the front door of the powder module.

2 Press the power button to switch off the powder module. Pull out the tube connected to the mixer.

3 Unlock the mixer by turning the knob to the right. Take the mixer unit out.

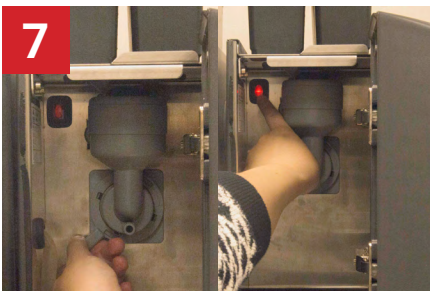

4 Pull out the mixer ring and the knob simultaneously.

5 Dissolve an Egro Milk System Cleaning Tablet in a container with warm water. Place pieces of the mixer unit into the solution. Allow to soak for at least 1 hour.

6 Wipe the powder module with a clean damp towel. Remount the knob and the ring back into the powder module pushing firmly until it clicks.

7 Reassemble the mixer unit into the powder module. Turn the knob to the left to lock. Reconnect tube to the mixer. Push power button to turn on the powder module.

Egro NEXT Powder Module

Weekly/As Needed Powder Hopper Cleaning

1
Open the powder module door. Unlock the powder hopper by pulling the metal latch on the front of the powder hopper.

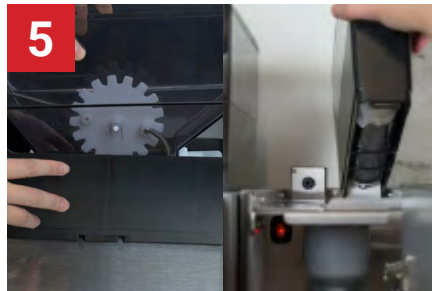

2
Remove the powder hopper by pulling the front upwards and forward. Remove the lid and empty the powder hopper.

3
Brace both sides of the base to unlock and remove the container.

4
Wipe the hopper clean with a dry cloth. Periodically, the hoppers can be cleaned with soap and water or in a dishwasher.

5
Insert back the container to the base. Refill the powder hopper with powdered drinks.

Remount the powder hopper, inserting the back guide first.

6
Make sure the dispensers are towards the middle into the mixer unit. Right powder hopper dispenser should be to the left. Left powder hopper dispenser should be to the right.

Push the metal latch firmly. Close the powder module door to finish the cleaning.
