

MODE PRO MILK

The MoDe is a super-automatic espresso machine that packs the latest Ego technology into a compact design. High performance and versatility are combined in a sleek brewer with solutions to improve coffee quality and speed up service. The Pro Milk model fits cleanly in both staffed and self-service concepts.

FEATURES

Upgraded Milk System

The Pro Milk model adds a powerful pump module that enables improved milk steaming performance, cold milk delivery, and automatic line rinsing.

Premier Drink Quality

Every Ego model is built with coffee quality at the forefront. Our proven brewing system delivers best-in-class taste and precise control over brew variables.

Customizable Interface

A new simplified user interface allows you to personalize icons, backgrounds, screensavers, and more.
